

Safetop Mesh

Roll top mesh looked very different from other types of mesh and is often quoted as “user friendly” mesh. It has distinctive rolled top and bottom edges to the panels making this system an ideal choice where user safety needs to be considered. The open mesh design provides good visibility and with no sharp or protruding edges, it makes this system ideal for areas where children are playing or in public areas. This attractive, safe and sturdy mesh system is an obvious choice for nurseries, primary schools and playgrounds. Our safetop 3.0m wide panels are available in 1.2M, 1.5M and 1.8M heights, while heights over 1.8M can be achieved using a multilift system which is a combination of panel heights. All our “Safetop” mesh comes galvanised and powder coated in our standard colours, however, as with all our mesh systems other colours can be specified. This system comes complete as a kit using 60x60 SHS posts and M8 Anti-tamper fixings.

Suitable For:

- Schools
- Nurseries
- Car Parks
- Public buildings

Key Features:

- Good visibility
- Available from Stock
