

Palisade

As a manufacturer of Palisade fencing, CLA ensure that only top quality materials are used in its production. CLA produce the modern “W” profile pale. The reinforcing shape of the “W” profile produces a strong and resilient pale. This system comes supplied in a Galvanised finish as standard with an option to Polyester Powder Coat.

CLA Palisade fencing is predominately used to secure large areas where a permanent cost effective but formidable long-lasting security deterrent is required. The pointed pale top act as a climbing deterrent and the style and shape of the pales gives little grip and deters climbing.

With no compromise on quality materials and protective treatments, our range of palisade fencing is low maintenance yet strong, sturdy and durable.

Suitable For:
