

CHILDSAFE

ROSPA
Compliant

Our Childsafe range of bowtop railings have been designed with careful consideration to form a child safe and attractive boundary typically to play areas. The railings are designed to RoSPA guidelines so you can be confident that safety is our main priority.

Childsafe railings are designed to hinder children from trapping their heads, neck or limbs. This design of railings also allows parents or guardians a clear view through the bars. They also conform to BS EN 1176 playground specification with the gaps not exceeding 89mm.

To complete the boundary area, we have designed a range of pedestrian and maintenance gates to match the railings. Our Childsafe range comes as standard supplied in a galvanised finish to BS EN 10345:2009 with an option to polyester powder coat to BS EN 13438:2005.

Gate Options

ROSPA
Compliant

Chidsafe Self-Closing Pedestrian Gate

Our Chidsafe self closing gate is the perfect addition to any playground. The self closing APS unit makes the gate virtually impossible to slam shut and prevents it from swinging back when pushed hard. Supplied as Galvanised and PPC Yellow as standard. This makes the gate easily visible for children using the facilities.

Leaf Size: 1105mm Overall width: 1340mm
Available as standard in both 1m & 1.2m heights.

Chidsafe Double Leaf Maintenance Gate

ROSPA
Compliant

These additions to our Chidsafe range are designed to allow maintenance vehicles into playareas. With the manual leaf still having the APS self closer it doubles up as a pedestrian access gate also, with a drop bolt on the manual leaf to keep it locked into place. Supplied as Galvanised and PPC Yellow as standard. This makes the gate easily visible for children using the facilities.

Overall width: 3000mm
Available in both 1m & 1.2m heights.
