

# 868 Rebound

The 868 Rebound Twin Wire system is a heavy-duty fencing solution designed for multi-use games areas and sports courts. Manufactured from high-quality steel, it provides excellent strength, durability, and resistance to impact and vandalism, making it suitable for demanding sporting environments.

Each panel features an 868 twin wire configuration, with a 6 mm vertical wire sandwiched between twin 8 mm horizontal wires to deliver outstanding rigidity and long-term structural integrity. The lower 1.2 m of the panel is reinforced with additional horizontal wires, creating an effective rebound zone and improving resistance to repeated ball impact.

Panels are securely fixed using a full-length clamp bar system for a stable and professional installation. Optional EPDM washers help reduce vibration and minimise impact noise.

## Suitable For:

- Multi-use games areas
- Playgrounds
- Schools
- Sports Facilities

## Key Features:

- Attractive Design
- Available from Stock
- Medium Security
- Flush panel design

## Product Finishes:

6005
